Promotional rates apply only to SH 130, Segments 1-4 and SH 45 Southeast for a period of up to one year, effective April 1, 2013. During the promotional period, the 2-axle rate (effective January 1, 2013, as escalated or amended) will be charged to all vehicles, regardless of classification. The purpose of the promotion is to reduce traffic congestion on I-35 and to make Central Texas roadways safer by encouraging greater through trips of trucks on Central Texas toll roads. The Commission has allocated \$5 million to be used to make up the difference in revenue between the temporary toll rates charged to vehicles with more than 2 axles and the standard toll rates. Once the funds are depleted, the discount program will end.
